Mary,

I'm afraid they aren't able (willing?) to help with getting the 1999 manual.

Sorry we couldn't assist you on this one.

Linda

Hello Linda,

Thank you for your email. Unfortunately we do not have any of the older manuals, as that is from several years ago. That patron may wish to simply upgrade their package, and they will receive a new manual with the upgrade. Sorry that I could not be of more assistance.

Regards,

Sheldon

Subject: searching for a manual

Hello,

I am a librarian at the United States Patent & Trademark Office, located in Arlington, VA. I'm trying to find a copy of a Lasergene Manual from 1999 for a patron. Do you hold older manuals, and can we purchase one? The cite just reads "Lasergene99 v4.0". If it is a multi-volume set we would be happy to purchase the whole set if necessary.

Please let me know if you can help.

6/4/03

Thank you very much,  
Linda

Hi Mary,

We will try to locate a copy of the Lasergene manual for 1999. Normally, if the company still holds the older copies, you don't need to also purchase the software. It's usually just a matter of whether or not they have any copies that they are willing to part with.

I'll let you know when I get a response from DNASTar.

Regards,  
Linda

Would it be possible to obtain the product manual for the "Lasergene" software from DNASTar? I have a reference from 2000, that cites "Lasergene99 v4.0", and explains many features, but I need more detail for my particular case. It is this particular version I am interested in, as well as a publication date for the manual for this version.

I tried to see if I could download the manual from their website, but it appears you need to be a customer to have access to that information.

<http://www.dnastar.com>

If it is exceedingly expensive, or we would have to buy the software to get the manual, I can probably live without it, but I think the manual would make a stronger basis for my rejection.

Thanks,

Mary Z
